(54) PORTABLE MOBILE COMMUNICATION TERMINAL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a portable mobile communication terminal realizing a call whose sound volume and quality are satisfactory even when a casing is miniaturized and a display unit is enlarged.

SOLUTION: In a very small portable mobile communication terminal, a receiver port for a very small receiver used in a regular call is installed on the surface of the casing and a speaker port for a loud speaker used at the time of a hands-free call is arranged at the back of the casing. A key operation part as a backside call mode selection means for selecting a mode at the time of the call and a loud speaker sound volume switch for adjusting the output sound volume of the loud speaker are installed. When the backside call mode is selected by using the key operation part, the output sound volume of the loud speaker is adjusted using the loud speaker sound volume switch so that the sound volume of the speaker is reduced to a set level.
